The Business Service Portal (‘Unternehmensserviceportal’) is the flagship project of the Austrian Federal Government’s initiative to cut red tape. It is jointly coordinated by the Federal Ministry of Finance (BMF) and the Federal Chancellery (BKA). The portal serves as a single entry point to Government for businesses. By offering information and transaction services it enables businesses to meet their reporting obligations to the authorities as simply and efficiently as possible. This single gateway to government information and transaction services will significantly increase the attractiveness of doing business in Austria. Businesses can use this portal to find relevant information, submit data to meet their information requirements and use online procedures to interact with the authorities. A single access point is offered for previously existing applications, such as ‘FinanzOnline’ (virtual tax office), the electronic data exchange with Austrian social security institutions (ELDA), and the Data Processing Register (DVR). Furthermore, information on reporting and information requirements will be combined and offered in one platform.
